

Week of August 31, 2026

Activity

Crews will continue several activities within the Advanced Water Purification Facility (AWPF) site, including:

- Backfilling and importing dirt as part of ongoing site earthwork
- Mobilizing and installing shoring (excavation support)
- Continuing construction of the soil nail retaining wall

Shoring installation will continue to be a primary construction activity at the AWPF site for approximately one week. This work is necessary to provide support for excavation and ongoing construction within the site.

Due to the nature of this activity, additional daytime construction noise and occasional vibration may occur. Crews will implement measures to help minimize impacts to the surrounding community.

Trucks and heavy equipment will continue entering and exiting the construction site throughout the week to support excavation and earthwork. Crews will implement measures to help minimize impacts throughout construction.

Construction is a dynamic process. This information and the project schedule are subject to change due to weather, field conditions, and other factors.
